PROFESSIONAL SUMMARY

Third-year BSc Artificial Intelligence student with hands-on experience across machine learning, deep learning, computer vision, natural language processing, and full-stack development. Skilled in building end-to-end AI applications, including Retrieval-Augmented Generation (RAG) systems, AI chatbots, and real-time computer vision tools, along with REST APIs and web platforms. Strong analytical thinker and fast learner, seeking an internship or freelance opportunity to apply technical and analytical skills to real-world AI and data-driven solutions.

TECHNICAL SKILLS

Programming & Core CS: Python, Java, C, Object-Oriented Programming (OOP), Algorithm Analysis & Logical Thinking

AI & Machine Learning: Machine Learning, Deep Learning (CNN), Retrieval-Augmented Generation (RAG), Prompt Engineering, Computer Vision, Natural Language Processing (NLP), Predictive Modeling, Feature Engineering, Model Evaluation, TensorFlow (Basic), Scikit-learn, Sentence Transformers, Faster-Whisper, RiveScript (Rule-Based & Hybrid Chatbots)

AI Frameworks & Libraries: ChromaDB, OpenRouter API Integration, MediaPipe, OpenCV, NumPy, Pandas, Matplotlib, Streamlit (Interactive ML & Data Apps), Seaborn, NetworkX

Full-Stack Development: FastAPI, Flask, React, Tailwind CSS, REST APIs, JWT Authentication, SQLAlchemy

Developer Tools & Platforms: Git & GitHub, Docker, Docker Hub, Jupyter Notebook, Google Colab, VS Code, Postman, FFmpeg, yt-dlp

Databases & Querying: PostgreSQL, SQLite, SQL (Joins, Queries, Aggregations), MongoDB Compass, Relational Database Concepts

Data Analysis & Visualization: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, JSON & REST API Integration

Software Development: Object-Oriented Programming (OOP), Problem Solving, API Development, Full-Stack Application Development, AI Chatbot Development, Real-Time Computer Vision Applications

Productivity Tools: Microsoft Excel, Microsoft PowerPoint, Microsoft Office

Core Strengths: Analytical Thinking, Project Development & Execution, Continuous Learning, Team Collaboration, Technical Documentation, Debugging & Performance Optimization

PROJECTS & EXPERIENCE

AI & Full-Stack Projects

DeepDive AI - Intelligent Video Learning & Knowledge Assistant (Featured Project)

- Developed a full-stack AI platform that transforms YouTube videos and uploaded media into structured learning resources.
- Built an intelligent content classification pipeline that automatically identifies lectures, meetings, podcasts, news, interviews, recipes, and entertainment videos, generating tailored outputs for each category.
- Implemented AI-powered video chat using Retrieval-Augmented Generation (RAG), enabling users to ask questions and receive context-aware answers grounded in the video transcript.
- Added features including chapter-wise summaries, flashcards, quizzes, action items, PDF export, timestamp-based learning, and progress tracking.

Sortix AI - Persona-Based AI Chatbot Platform (Real-World Solution)

- Designed and developed a customizable AI chatbot platform where users can create domain-specific AI assistants.
- Implemented knowledge retrieval, conversational memory, document-based question answering, and persona-driven responses.
- Built secure authentication and scalable backend architecture for managing AI assistants and user interactions.

AI Gesture-Controlled Space Defender

- Developed a real-time computer vision game controlled entirely through hand gestures captured via webcam.
- Implemented gesture-based navigation, gameplay controls, collision detection, score tracking, and local leaderboard management.
- Optimized gesture recognition for smoother and more responsive gameplay.

AI LinkedIn Post Generator

- Built an AI-powered web application that generates LinkedIn posts from user prompts with customizable tone, length, and writing style.
- Added post regeneration, copy-to-clipboard functionality, and recent post history for an improved user experience.

Machine Learning Projects

- Instagram Virality Prediction - Developed a machine learning model to predict the viral potential of Instagram posts using Kaggle datasets.
- Sleep Disorder Predictor - Created a web-based machine learning application for predicting sleep disorders.
- Image Classification using CNN - Built a deep learning model for image classification using Convolutional Neural Networks.
- Machine Learning Mini Projects - Implemented multiple predictive and classification models using real-world datasets.
- Joke Generator Application - Developed an interactive Python application for automated joke generation.

Academic Projects

- Shopping Cart System (Java) - Implemented using Linked List data structure.
- Cinema Seat Booking System (Java) - Simulation using 2D Arrays.
- Java Application Development - Academic projects using OOP & GUI concepts.
- Student Management System (Python) - Built a system for managing student records and academic information.
- University Management System (Python) - Developed a management system for university operations.
- Python Mini Projects - Completed multiple programming projects focused on logic building and problem solving.

VIRTUAL & INTERNSHIP EXPERIENCE

- AI & ML Intern - Techwave Developers - Built AI-powered applications.
- Virtual Experience - Deloitte Australia (Forage) - Data Analytics program.

EDUCATION

University of Sindh, Jamshoro

Bachelor of Science in Artificial Intelligence (In Progress)

Expected Graduation: 2027

Govt. Shah Latif Girls College, Hyderabad

Intermediate

2021 - 2023

Grade: A-1

New Falconhouse Grammar School, Hyderabad

Matriculation

2019 - 2021

Grade: A-1

CERTIFICATIONS

- Google AI Professional Certificate - Google | Coursera (Completed)
- Python for Data Science - Coursera (Completed)
- Python for Data Engineering - Coursera (Completed)
- Foundations of AI & Machine Learning - Coursera (Completed)
- Relational Databases (RDBMS) Essentials - Coursera (Completed)
- Generative AI: Prompt Engineering - Coursera (Completed)

INTERESTS

- Exploring online courses on Coursera.
- Developing interest in AI and related technologies.
- Watching educational videos and tutorials.
- Creator of a YouTube channel exploring and sharing content blending creativity, lifestyle, and digital storytelling.
